Prevention and Intervention Strategies for Lung Infections

Message from the Guest Editor

Lung infections can be pervasive and contribute to significantly poor outcomes in hospitalized and community adults. These lung infections may be acute and a single event, chronic in nature or complicate care for those with cancer and other chronic conditions. This Special Issue explores lung infections through the lens of prevention strategies and interventions required to restore health in both acute care and community settings. This collection of papers draws on evidence from around the globe, contributing to the existing body of knowledge associated with lung infections.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
