

## Special Issue

# Psychological Distress in the Aftermath of the COVID-19 Pandemic

### Message from the Guest Editors

The COVID-19 pandemic bears the hallmarks of a collective trauma. It appeared quite unexpectedly, affecting entire communities and every possible area of our lives: family, work, relationships with loved ones. For a long time, it limited our usual activities, preventing us from taking care of ourselves in the way that used to be natural to us. We face the economic, but also the emotional, consequences of the pandemic all the time. This Special Issue of *IJERPH* is devoted to these consequences: "Psychological Distress in the Aftermath of the COVID-19 Pandemic".

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
