

Special Issue

Mental Health in Healthcare: Challenges and Perspectives from the Past to the Future

Message from the Guest Editor

This Special Issue seeks to address not only the mental health challenges faced by healthcare professionals but also the quality of mental health care they provide to patients and their families. The stressors faced by healthcare professionals—ranging from high-stakes environments and resource shortages to ethical dilemmas—impact both their well-being and the support they are able to offer to those under their care. This Special Issue invites interdisciplinary research that explores these dual dimensions—how to protect and enhance the mental health of healthcare professionals while also innovating the mental health care they deliver. Topics of interest include resilience-building for professionals, organizational strategies for supporting mental health, approaches to family-centered care, and technologies that improve mental health service delivery. Submissions with practical and systemic implications are particularly welcome.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
