Disease Knowledge, Self-Efficacy, and Quality of Life in Patients with Chronic Diseases

Message from the Guest Editor

People with chronic conditions have a variety of needs across their lifespan. Whether they are recovering from a mental or physical illness, they strive to live life to the fullest. The aim of this Special Issue is to publish the latest scientific discoveries to maintain and improve their well-being and quality of life. We welcome articles related to disease awareness, self-efficacy, or quality of life that contribute to the health and well-being of people with chronic conditions. We also welcome articles on measures of well-being or quality of life for people with chronic conditions. I look forward to receiving your contributions to this Special Issue.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
