

## Special Issue

# Long COVID-19 and Its Impact on Public Health

### Message from the Guest Editors

Long COVID is a complex syndrome representing a significant public health challenge worldwide. It is one of the most frequent long-term effects observed in COVID-19 survivors and impacts the population's quality of life. Neuropsychiatric conditions, including anxiety and stress, are common and debilitating features in this population and are major public health challenges. Understanding their burden and predictors is fundamental for comprehensive care and evidence-based public policies. This Special Issue, titled "Long COVID-19 and Its Impact on Public Health", seeks high-quality submissions exploring the multifaceted impacts of long COVID. We specifically invite research on the prevalence, predictors, mechanisms, prevention, public policies, and intervention strategies for anxiety and stress in this context. Articles contributing to our understanding of the syndrome's burden and informing public health responses are particularly welcome.

### Guest Editors

Dr. Laelson Rochelle Milanês Sousa

Prof. Dr. Elucir Gir

Dr. Renata Karina Reis

Dr. Rafael Fernandes de Mesquita

Dr. Daniel Macedo Rocha

### Deadline for manuscript submissions

30 April 2026

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
