Special Issue

Substance Use Research Methods: Ethics, Culture, and Health Equity

Message from the Guest Editors

The social marginalization of people who use alcohol or other psychoactive substances, driven by factors such as stigma, discrimination, and the criminalization of substance use, undermines health and wellbeing and is a barrier to health equity, including health service access. Conversely, this social marginalization is also a barrier to public health practitioners and researchers who are seeking to reduce substance-related harm. People who use substances are often warv of participating in research and disclosing their personal information. This Special Issue is open to any studies of substance use research methods, particularly those that reflect on public health, the behavioral environment, comorbid mental health disorders, risk and treatment for sexually transmitted and other infections, ethics, culture, health equity, and/or consumer participation.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

Centre for Public Health, Equity and Human Flourishing, Torrens University Australia, Adelaide 5000, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
