

Special Issue

Cultural Resilience and Health Equity: Centering on American Indian and Alaska Native Communities

Message from the Guest Editor

Indigenous peoples continue to thrive due to their cultural values, strengths, and resilience, despite persistent and systematic adversities at multiple ecological levels occurring across generations. In this Special Issue, we wish to showcase health promotion via cultural frameworks, the centering of cultural values and philosophies, communication strategies, development of measures for Indigenous populations, evaluation approaches, and the determination of health outcome success from an Indigenous perspective. The aim of this Special Issue is to highlight interdisciplinary research conducted for and by American Indian and Alaska Native peoples and their communities for the purpose of health promotion.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward
