Physiological Assessment of Sports Training and Exercise

Message from the Guest Editors

Monitoring physiological responses during training is crucial for improving sports performance and health. In this perspective, invasive and non-invasive, direct and indirect possibilities are valid tools for acquiring data associated with the physiology and biochemistry of physical exercise. Additionally, new physiological protocols or consolidations of existing tests through which to identify the effects of physical training are necessary approaches within this context. In this Special Topic, submissions related to the effects of physical training on athletes, non-athletes, and physically active or sedentary individuals are welcome. New evaluation protocols for this purpose are also valid, as long as their reproducibility and validation are rigorously monitored. Studies with large amounts of monitoring during training are particularly encouraged.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
