

## Special Issue

# Editorial Board Members' Collection Series: Climate Change, Health, and Inequities

### Message from the Guest Editors

We are pleased to announce this Collection titled “Editorial Board Members' Collection Series: Climate Change, Health, and Inequities”. This issue will be a collection of papers from researchers invited by the Editorial Board Members. Climate change exacerbates existing health and social inequities. Climate change itself worsens environmental conditions (e.g. ozone pollution) associated with chronic illness and injury and causes social and economic dislocations that most impact disadvantaged communities. The aim is to provide a venue for networking and communication between IJERPH and scholars in the field of Climate Change, Health, and Inequities. All papers will be published with fully open access after peer review.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
