

Special Issue

Food Choices, Consumption, Nutrition Behaviors, and Human Health

Message from the Guest Editor

Healthy dietary practices start early in life with breastfeeding fostering healthy growth that improves cognitive development, and may have longer term health benefits. However, increased production of processed foods, increasing food prices, climate change impacts, rapid urbanization and changing lifestyles have led to a shift in individuals and household's dietary patterns and nutritional outcomes.

This Special issue welcomes original studies that consider and links food-nutrition economics with economic principle and theories, economics of food and nutrition behavior, food-nutrition and health economics, climate change-food and health economics, dietary diversity, hunger and undernourishment, consumer food choices and nutritional outcomes with a focus on micro and macroeconomic issues of significant development policy relevance to the attainment of the United Nation's Sustainable Development Goals (SDGs). This Special Issue will highlight the most recent advances in all aspects relevant to food-nutrition behaviors and health economics. You could find the detailed information via the following link:

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
