

## Special Issue

# Progress Toward the UNAIDS 95-95-95 Targets for HIV Care Cascade

### Message from the Guest Editor

HIV/AIDS continues to represent a major public health problem globally. The Sub-Saharan Africa (SSA) region is disproportionately affected; 65% of people living with HIV globally reside there, and it has the highest number of new HIV infections and AIDS-related deaths. UNAIDS has set the 95-95-95 targets, to be achieved by 2030, aiming for 95% of people living with HIV to know their status, 95% of those diagnosed to be on treatment, and 95% of those on treatment to have viral suppression. These targets are important in tracking progress toward eliminating HIV/AIDS in line with Sustainable Development Goal (SDG) 3.3, which aims to end the epidemics of AIDS, tuberculosis, malaria, and neglected tropical diseases by 2030. This Special Issue of the *International Journal of Environmental Research and Public Health* (IJERPH) will focus on the current progress on the UNAIDS 95-95-95 HIV cascade of care. It is an opportunity to gather scarce data on HIV cascade of care in order to inform interventions to reduce the burden of HIV/AIDS globally. New research papers, scoping reviews, and systematic reviews and meta-analyses are welcome.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
