

## Special Issue

# 2nd Edition: Advances in Pediatric Dental Care in Relation to Public Health

### Message from the Guest Editor

Dental public health and pediatric dentistry are two recognized specialties. Looking at the definition of each of them, one can easily see that they are closely intertwined. Dental public health is concerned with the diagnosis, prevention, and control of dental diseases, as well as the promotion of oral health through organized community efforts. Pediatric dentistry is concerned with providing primary and comprehensive preventive and therapeutic oral health diagnosis, care, and consultative expertise for infants and children through adolescence, including those of all ages and with special care needs. This Special Issue of the *International Journal of Environmental Research and Public Health* aims to publish articles focusing on dental public health issues in pediatric dentistry.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
