

Special Issue

Key Safety Measures for Risk Mitigation in Occupational and Environmental Cancers

Message from the Guest Editors

In this Special Issue, we invite you to reflect on the global impact of occupational and environmental exposure to carcinogenic agents as well as on the impact of tumors on public health, as they represent a leading cause of death worldwide. Over the years an enormous amount of scientific information has been published and has helped to clarify many aspects of the carcinogenic process. We strongly believe in and emphasize the importance of the multidisciplinary and strategic collaborative effort in hazard identification, prevention, and control measures in both occupational and public settings and in the development of appropriate therapeutic methods that can improve survival and quality of life of cancer patients. Therefore, authors are invited to submit their latest research regarding cancer agents and the latest developments in mechanisms of carcinogenesis, diagnosis, and cancer therapy.

Guest Editors

Dr. Catalina Ciocan

Dr. Alessandro Godono

Dr. Marco Clari

Deadline for manuscript submissions

24 June 2026

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
