

Special Issue

Health Intervention for Young Children with or at Risk for Disabilities

Message from the Guest Editor

Welcome to this Special Issue of IJERPH dedicated to the topic of “Health Interventions for Young Children with or at Risk for Disabilities”. This Special Issue aims to explore a range of innovative interventions aimed at promoting the health and development of young children with disabilities or at risk for disabilities. From early screening and diagnosis to evidence-based interventions and family-centered care approaches, the articles within this issue delve into various aspects of health intervention strategies tailored to the unique needs of this population.

Through rigorous scientific inquiry and interdisciplinary collaboration, the contributors to this Special Issue aim to advance our understanding of effective health interventions for young children with disabilities, ultimately striving to enhance equity and the quality of life for these children and their families. We hope that the insights presented in this Special Issue will inform policy, practice, and future research directions, fostering positive change and improving outcomes for vulnerable children worldwide.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
