Special Issue

2nd Edition: Public Health during and after the COVID-19 Pandemic

Message from the Guest Editor

On 11 March 2020, the World Health Organization declared COVID-19 a global pandemic. Over a year later, the pandemic has highlighted the fragility of the healthcare system and the consequences for people's wellbeing. The pandemic has impacted all areas of the health system. Indeed, scientific evidence shows significant changes in access to primary and specialist care: available resources: trends in chronic degenerative diseases: the effects of isolation on children, on adolescents, and mental health in general; habits and lifestyles (nutrition and physical activity): delay in early diagnosis; and increased overall mortality. It has also highlighted existing health inequalities such as chronic health conditions, while unequal living and working conditions have inexorably increased the prevalence and severity of COVID-19 infections. This Special Issue aims to publish original articles dealing with various aspects of public health.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation, Richard N. Dixon Research Center, Morgan State University, Baltimore, MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
