Sexual Health and Sexual Behavior in the 21st Century

Message from the Guest Editor

The concept of sexual health no longer refers only to the absence of pathology or dysfunction, but to the presence of a good attitude on a psychological and relational level toward sex. Sexual health requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having pleasurable and safe sexual experiences, free from coercion, discrimination, and violence. To achieve and maintain sexual health, the sexual rights of every human being must be respected, protected, and fulfilled. Unfortunately, sexual rights are not always respected, and while there has been a broader openness with respect to sexuality in recent years in many parts of Europe, one key part is missing: sex education. "Sex education" means learning relative to the cognitive, emotional, social, relational, and physical aspects of sexuality. It begins early in childhood and continues throughout adolescence and adult life. Modern society lacks the necessary knowledge, especially when there is a need for complex and technical information (such as that concerning contraception or how sexually transmitted infections are transmitted).

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
