

Special Issue

Interventions on Health Equity Promotion among Racial and Ethnic Populations

Message from the Guest Editor

Racism and other social determinants of health impact access to resources and opportunities and differentially influence the exposure to risk and protective factors. This Special Issue focuses on interventions to promote health equity among racially minoritized populations. Some possible topics include, but are not limited to, the following:

- Evaluation of interventions to decrease the risk of adverse health outcome among racially minoritized populations;
- Evaluation of policies that directly or indirectly impact the health of racially minoritized populations;
- Assessment of changes in racial and ethnic health inequities over time as a result of an event, intervention, or policy change;
- Description/study design or the feasibility, acceptability of an intervention to reduce racial and ethnic health inequities;
- Training of communities to address health issues.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
