

Special Issue

Association between Urban Environment and Civil Well-Being

Message from the Guest Editors

Nowadays, there are over 3.9 billion people living in the urban areas. Therefore, to identify the relationship between the urban environment and civil well-being becomes a central issue in sustainable science. This special issue focuses on the dynamics of urban environment and civil well-being. We welcome both empirical and conceptual papers investigating how urban environments influence civil well-being in city scale. For this Special Issue, papers will need to contribute to new theories, new methods, new data and new situations of urban environment and civil well-being. What meaningful implications can be proposed for mental condition management? The guest editors look forward for your valuable contributions!

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
