Pandemic Preparedness: Lessons Learned from COVID-19

Message from the Guest Editor

The International Journal of Environmental Research and Public Health is preparing an important and timely Special Issue with the theme "Pandemic Preparedness: Lessons Learned from COVID-19", as the ongoing COVID-19 pandemic has highlighted the need for robust mechanisms and global preparedness and responses to such public health crises. In this Special Issue, a variety of research articles, reviews, and perspectives that cover different aspects related to pandemic preparedness and lessons learned from the COVID-19 pandemic will be considered. The following are a few potential areas of focus that you may consider:

Epidemiology and Public Health Response; Healthcare Infrastructure and Capacity; Vaccine Development and Distribution; Communication and Information Dissemination; Global Collaboration and Preparedness; Lessons Learned and Recommendations; Ethical Considerations. We encourage a diversity of perspectives and methodologies in the articles selected for this Special Issue. This will help create a comprehensive and well-rounded collection of insights into pandemic preparedness.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
