

Special Issue

Improving Healthcare Quality

Message from the Guest Editors

Training in health sciences, which is increasingly important for a globalized world, requires professionals involved in multidisciplinary knowledge and trained to apply direct techniques to the patient/client. Over the past 10 years, my primary research has focused on patients' postoperative pain management and analgesic treatment. My studies include large numbers of prospective clinical cohort data reporting the proportions of patients achieving acceptable pain levels and the analgesics that patients have received perioperatively. This Special Issue invites research within quality standards, in narrative, scoping, integrative, as well as systematic reviews with/without meta-analysis and original articles (qualitative/quantitative) dealing with topics such as the improvement of higher education leading to quality interprofessional practice in a system centered on all areas involving direct patient care, encouraging a change in attitudes towards teamwork focused on interprofessional care and professional practice.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

Centre for Public Health, Equity and Human Flourishing, Torrens
University Australia, Adelaide 5000, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
