

Special Issue

Advancements in Digital Healthcare: Innovative Techniques, Software, and Protocols for the Measurement and Analysis of Human Performance

Message from the Guest Editor

This special Issue is meant to collect papers presenting novel methods for the advanced processing of datasets in the context of studies about comfort, ergonomics, human performance, occupational medicine, rehabilitation medicine and work-related injuries. The topics covered include: novel protocols for clinical motion analysis, clinical signal processing, innovative sensor systems and sensor networks, innovative methodologies for data processing: artificial intelligence and machine learning, methodologies to handle and store safely public health data, methodologies and sensor system applied to sports and performance evaluation.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
