

## Special Issue

# Intelligent Systems for One Digital Health

### Message from the Guest Editors

This Special Issue will present contributions on intelligent systems that (currently or potentially) enhance ODH across domains such as:

- Machine learning and deep learning in biomedical applications;
- Digital health, digital therapeutics, digital biomarkers;
- Big data, omics models, digital twins, precision medicine;
- Psychology of health, aging, disability, inclusion;
- Wearable technologies, Internet of Things, ambient intelligence;
- Robotics, extended reality, telemedicine, telerehabilitation;
- Human, animal, environmental monitoring for public health;
- Smart systems in agriculture, farming, the food industry, and the drugs industry;
- Medical devices usability and ergonomics, health technology assessment;
- Ethical and legal issues in healthcare systems.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
