

Special Issue

Advances in Socio-Economic Research on Ageing

Message from the Guest Editors

The International Journal of Environmental Research and Public Health intends to publish a monographic issue on “Advances in Socio-Economic Research on Ageing”. Giovanni Lamura and Cristina Gagliardi (both senior researchers at INRCA-IRCCS, Italy’s National Institute of Health and Science on Ageing, Centre for Socio-Economic Research on Ageing) will be guest editors. The proposed topic represents, in a time where population ageing is no longer a phenomenon characterising only wealthier countries, but rather a globalised trend with an increasing number of middle and even low income nations reporting a larger number of people reaching an older age, a growing field of science that seeks to understand the process of ageing and the challenges it poses, both at an individual (micro) and societal (macro) level. This Special Issue aims at collecting high quality contributions dealing with the multifaceted factors both affecting and affected by this phenomenon, from a demographic, social, economic, and/or political perspective.

All works will be peer reviewed by experts of the specific field of interest. The deadline for delivery is 29 February 2020.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
