

Special Issue

Risk Factors for Adolescent Substance Use and Addictive Behaviors

Message from the Guest Editors

A wide range of topics will be included in this Issue, related to risk and protective factors for addictive behaviors and substance use during adolescence, including risk perception, neurobiological risk factors, socioeconomic and cultural factors for smartphone addiction, internet addiction, internet gaming addiction, substance abuse (tobacco, alcohol cannabis), etc.

This Special Issue in the International Journal of Environmental Research and Public Health is dedicated to recent findings on “Risk Factors for Adolescent Substance Use and Addictive Behaviors” to make substantial contributions to knowledge in understanding why some adolescents engage in these high-risk health behaviors.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
