Diagnosis and Treatment of ADHD in Adolescents

Message from the Guest Editors

Assessing and managing attention-deficit/hyperactivity disorder (ADHD) in adolescence are unique challenges to physicians. There are many factors affecting physicians' comfort and ability to screen, diagnose, and treat adolescent ADHD. First, some of the ADHD symptoms, such as extreme hyperactivity, may be more subtle in adolescents than in younger children; second, obtaining reliable reports of adolescents' current and past symptoms is difficult; third, the presence of comorbidities may complicate the diagnosis of ADHD; fourth, demanding that all adolescents grow with the expected increases in responsibility, planning, future orientation, and organization is unrealistic, since these are the key areas that are problematic for adolescents with ADHD. Thus, it can be difficult to determine if an adolescent is exhibiting "typical immaturity" within the range of healthy adolescence or ADHD. This Special Issue invites researchers to submit empirical studies associated with the diagnosis and treatment of ADHD in adolescents. It is also open to the submission of studies investigating risk factors and risk-taking behaviors in adolescents with ADHD.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
