Advances in Forensic Pathology: Reviews, Case Reports, Rare Diseases, and Experimental Research

Message from the Guest Editor

Forensic Pathology with histology is very important for diagnosing the causes of death, and also for providing professionals with new elements for the early diagnosis of diseases. Research in this area is very slow and requires increasingly reliable aspects and markers, especially for the solution of medico-legal cases in patient management.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
