

Special Issue

Ageing and Health: A Functional and Psychological Perspective

Message from the Guest Editors

This Special Issue will take a multidimensional approach to examining the underlying mechanisms to conditions and events that impact the health of the aging population. We will accept scientific works focusing on conceptual issues around attentional processing in aging populations, literature reviews, measurement and assessment of physical and psychological functioning in aging, and motor skill deterioration and its impact on activity of daily living and wellbeing of the older population. This Special Issue welcomes research that has taken an interdisciplinary approach to explore the complex and dynamic relationship between gerontology and health. This call is open to research reports, scholarly reviews, and professional-application articles.

Guest Editors

Dr. Daniele Magistro

Dr. Noel Kinrade

Dr. Giovanni Piumatti

Prof. Dr. Massimiliano Zecca

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
