Advances in Neuropsychological and Neuropsychiatric Rehabilitation

Message from the Guest Editors

In recent years, neuropsychological and neuropsychiatric rehabilitation has undergone a continuous evolution in its visions and principles. The impact of cognitive functions on motor and behavioral development, as well as for mental health, has aroused great interest across the international landscape. In rehabilitation, this led to the development of specific methods and interventions for motor, cognitive and mental recovery. In addition, different theoretical approaches led to investigations of the impact of technologies on motor learning and cognitive functions. The knowledge regarding the impact of neuropsychological and neuropsychiatric rehabilitation on people's quality of life is growing. This Special Issue aims to collect original and novel research papers on neuropsychological and neuropsychiatric rehabilitation in both children and adults. Studies on the application of new technologies (virtual reality, software, devices) and assistive products, innovative rehabilitation approaches, psychometric properties of assessment tools, and systematic reviews and their relevant meta-analyses are the best candidates for this Special Issue.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
