

## Special Issue

# Applied Health Econometrics

### Message from the Guest Editors

Econometric analysis is a constantly expanding area of knowledge that is providing researchers with better tools to analyze different economic problems. These advances have occurred regardless of the type of data used. They can be found in timeseries analysis, where unit root tests and cointegration analysis play an essential role, as well as in the case of using cross-sectional data—the increasing use of spatial econometric techniques is a good example. Finally, the creation of new databases has led to a great growth in the use of panel data techniques. The objective of this Special Issue is to collect applications that use recent advances in econometrics, all applied to the field of health economics. The Editors encourage presentations that address new econometric techniques to analyze and predict the evolution of different aspects of health economics.

### Guest Editors

Prof. Dr. Antonio Montañés

Departamento de Análisis Económico, Universidad de Zaragoza  
Dirección, 50005 Zaragoza, Spain

Prof. Dr. David Cantarero-Prieto

Health Economics Research Group (IDIVAL), Giencopsalud (SANFI),  
University of Cantabria, Santander, Spain

### Deadline for manuscript submissions

closed (31 August 2021)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
