

## Special Issue

# Assistive Technology in Promoting Health Equity for People with Chronic Conditions

### Message from the Guest Editors

Technology can promote self-management, communication, and consultation with health and social services providers, activities of daily living, and environmental comfort and safety. This Special Issue of the International Journal of Environmental Research and Public Health (IJERPH) focuses on providing a snapshot of the current state of knowledge related to the meaningful use of technology to promote health equity among diverse populations living with chronic conditions. New research papers, brief reports, methodological papers, reviews, and commentaries are invited to this issue. Papers should include implications for future research, policy, and other approaches that are needed to ensure technological advances reduce rather than widen health disparities among people and populations with chronic diseases. keywords:

- chronic diseases
- technology
- health equity
- healthcare disparities
- health status disparities
- minority health

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
