

## Special Issue

# HIV Care and Prevention— Where Are We Now?

### Message from the Guest Editor

HIV/AIDS has become a manageable health condition, coverage for antiretrovirals has increased, and promising prevention approaches (pre-exposure prophylaxis, or PrEP) have been adopted as key tools in ending the HIV epidemic worldwide. In spite of these advances, the incidence of HIV in parts of the world has risen, key populations (e.g., adolescent girls) remain disproportionately vulnerable to infection, structural and systemic drivers of HIV risk persist, and access to, as well as the implementation of, HIV prevention services have stalled. This Special Issue seeks to explore innovative solutions to persisting HIV prevention bottlenecks globally. Research studies can fall into one or more of the following categories: (1) novel intervention strategies addressing structural drivers of HIV (e.g., stigma, racism, and poverty); (2) strategies leveraging implementation science to assess and resolve barriers to the implementation of HIV prevention services operating at multiple levels; and (3) developing as well as testing combined prevention approaches.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
