

Special Issue

Application of Bioelectrical Impedance Analysis (BIA) in Human Health and Life

Message from the Guest Editors

For this Special Issue of *Nutrients*, we are seeking papers on application of bioimpedance analysis (BIA) in the pediatric and adult population. We welcome the submission of original research articles, reviews, and meta-analyses investigating the possibility of using bioimpedance to analyze the body composition in different age groups. Therefore, there is a need to analyse the possibilities of using BIA in various areas of human life.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
