

Special Issue

Biosimilars: Economic, Health Policy, and Public Health Issues

Message from the Guest Editor

A wide range of topics will be discussed in this Special Issue, related to, but not limited to, the analysis of the economic model of biosimilars, public or private regulations put in place, policies implemented to frame or encourage their use by doctors and pharmacists (incentives, substitution rules, quotas, etc.) and the results of such initiatives, organizational and public health impact of their arrival into the market worldwide (e.g., switch and follow-up of patients, profiles of treated patients, etc.).

Topics of interest include but are not limited to:

What is the economic model of biosimilars and their impact on the market?

What are the regulations implemented by legislators and national, regional, federal healthcare authorities across the world and their effectiveness?

What is the public health impact of introducing biosimilars into the therapeutic arsenal (healthcare organizations challenges, patient follow-up, traceability, information to patients)?

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
