

## Special Issue

# Exercise for Brain Health in Autism: A Promising Direction

### Message from the Guest Editor

This research topic, “**Exercise for Brain Health in Autism: A Promising Direction**”, determines the link between recreational activity, rehabilitation, brain activity, and cognitive training in the population with autism spectrum disorders. Potential topics include, but are not limited to, the following: Recreational activity as a benefit for brain health in the population with autism spectrum disorders; Optimization of rehabilitation process by:

- Investigating cognitive functions and brain activity;
- Investigating muscle and tendon mechanical (viscoelastic), morphological, and architectonic properties.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
