Impact of HIV on Children and Adolescents Living with HIV and Their Families

Message from the Guest Editor

Human Immunodeficiency Virus (HIV) and its sequelae, Acquired Immune Deficiency Syndrome (AIDS), have disproportionately affected the lives of various population groups, including children and adolescents living with HIV and their families. This Special Issue of the *International Journal of Environmental Research and Public Health (IJERPH)* focuses on exploring the various negative impacts of HIV on children and adolescents living with HIV and their families, and the factors contributing to those impacts. Original research papers, case reports, reviews and conference papers exploring these aspects will be accepted. This Special Issue also welcomes the submission of articles investigating the development of strategies and interventions to address the impact of HIV on children, adolescents, and their families.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
