

## Special Issue

# Family-Based Treatment Approaches in Child and Adolescent Mental Health Services

### Message from the Guest Editors

Research on mental health and well-being has focused on the mental health of individuals. However, for most individuals, and especially for children and adolescents, mental health and well-being are familial in nature. Parents and caregivers shape the mental health of children via family routines and modes of interaction. To advance the understanding and promotion of mental health in children and adolescents, the field needs to develop family-based clinical approaches. These new approaches require paradigm shifts in models of treatment delivery within health systems that are designed to treat individuals, not families. Additionally, family-based approaches can be developed in ways that are responsive to the needs of different cultural groups, and have the potential to improve participation and outcomes for racial, ethnic, and cultural groups that are underserved by existing clinical services. Papers seeking to explore, innovate, and elevate family-based mental health approaches are invited for submission to this Special Issue, especially those that consider cultural and historical contexts and those that focus on BIPOC communities.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
