# **Special Issue**

# Climate Change Adaption for Public Health

# Message from the Guest Editor

In this Special Issue, we would like to share the best public health adaptation strategies and technologies to minimize climate change impacts to public health. We highly encourage innovative ideas and insightful observations, such as policy analyses to identify current needs and gaps on climate change action plans, reviews of existing technologies that can be effectively converted to climate-resilient technologies, and introduction of new technologies in disaster preparedness, and in water, sanitation, and hygiene (WASH), with particular interest in rainwater harvesting, ground water treatments, and dry toilets with flood-proofness.

# **About the Journal**

# Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

# Editor-in-Chief

Prof. Dr. Paul R. Ward

Centre for Public Health, Equity and Human Flourishing, Torrens University Australia, Adelaide 5000, Australia

## **Author Benefits**

# **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

## Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
