

Special Issue

COVID-19 Outbreak and Beyond: Psychological and Behavioral Responses and Future Perspectives

Message from the Guest Editors

For this Special Issue, we welcome original studies on the worldwide psychological and behavioral impact of COVID-19 on targeted individuals (e.g., parents, social workers, patients affected by physical and mental disorders). Moreover, studies exploring the effect of COVID-19 using advanced statistical and methodological techniques (e.g., machine learning technologies) will be prioritized. Finally, researches with a focus on practical applications that could help identify persons at risk, mitigate the negative effects of this situation, and offer insights to policymakers to manage the pandemic are also highly welcomed.

Guest Editors

Prof. Dr. Paolo Roma

Dr. Merylin Monaro

Dr. Cristina Mazza

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
