Special Issue

COVID-19 Vaccine and Human Health

Message from the Guest Editor

COVID-19 has proven to be a serious threat to public health; our responses, however, have proven to have negative impacts on the vitality of the economies around the world. In the rush to forestall the spread of SARS-CoV-2, vaccine development was undertaken with breathtaking speed. As a result, vaccine uptake has been hampered. Valid concerns exist on health issues related to COVID-19 vaccination in some people. New technologies have been used and the translational science process was, in some cases, truncated (combined phases). The long-term safety of COVID-19 vaccines is not yet assessed. This has led to widespread concern over the safety and efficacy of COVID-19 vaccines.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

Centre for Public Health, Equity and Human Flourishing, Torrens University Australia, Adelaide 5000, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
