COVID-19 and Health Inequities: Opportunities, Challenges, and Future Directions

Message from the Guest Editors

The Coronavirus disease 2019 (COVID-19) pandemic has revealed societal vulnerabilities on a global level. COVID-19 hospitalizations and deaths have disproportionately affected low-income and marginalized communities, in part through chronic medical conditions such as hypertension, diabetes, obesity, and kidney, cardiovascular, and chronic lung diseases and in part through a global structure of inequity.

The Special Issue of IJERPH entitled “COVID-19 and Health Inequities: Opportunities, Challenges, and Future Directions” aims to capture many of the exciting investigations spanning clinical, community-engaged, and policy research around COVID-19 and health inequities.

We invite investigators to contribute original research (empirical and theoretical) and systematic reviews that will further broaden the understanding of the cultural, economic, political, and social factors that contribute to, or may decrease COVID-19-related health disparities.

Guest Editors

Prof. Dr. Keith C. Norris

Prof. Dr. Arleen F. Brown

Dr. Roland J. Thorpe, Jr.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
