

Special Issue

Supportive Care Needs and Quality of Life in Cancer Patients and Their Caregivers

Message from the Guest Editor

For this Special Issue we invite researchers worldwide working in the field of supportive care in oncology to submit papers about supportive care needs and quality of life of different cancer populations (any cancer stage/ phase/ site/ treatment). Contributions investigating lacks in supportive care (i.e., unmet needs), exploring the relationships between supportive care needs, quality of life and psychological outcomes, addressing assessment-related topics or focusing healthcare providers' / family caregivers' point of view about patients' needs are warmly welcome. Empirical papers (observational/ experimental quantitative/ qualitative/ mixed methods), including systematic reviews and meta-analyses, are all invited and the perspectives of public health, oncology, psychiatry and psychology will be all considered in this Issue. **Keywords:** Supportive care needs; Quality of life; Cancer; Caregivers; Psychological comorbidity; Psychosocial care; Assessment

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
