

## Special Issue

# Towards Carbon Neutrality: Behavior and Policy

### Message from the Guest Editors

Carbon neutrality has become the target of many countries and regions to achieve a better and more sustainable future. The path to realize carbon neutrality has been discussed broadly from the perspectives of energy, technology, society, and management. Regardless of which pathway is focused on, stakeholder behavior and policies play a key role in the implementation of a carbon neutral pathway. How to impact and change multi-stakeholders' behaviors to achieve carbon neutrality? How to make policies that drive energy structure adjustment, technological upgrade, and the formation of low carbon society? These issues need to be tackled by more dedicated academic research. This Special Issue of *IJERPH* focuses on how to approach carbon neutrality from the perspective of behavior and policy change.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
