

Special Issue

Cardiovascular Diseases and Healthy Aging

Message from the Guest Editor

Epidemiological, clinical, bioinformatics, and basic and intervention studies that advance our knowledge of the signaling pathways related to the cardiovascular diseases are invited for this Special Issue, especially those with a translational focus. These approaches can lead to the development of early diagnostic tools, as well as possible preventive and therapeutic strategies for cardiovascular complications in subclinical stages, which translates into a significant improvement in the survival and quality of life of the population at high cardiovascular risk, thus, contributing to the healthy aging of these patients.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
