

## Special Issue

# The Risk of Obesity, Cardiovascular Disease and Diabetes

### Message from the Guest Editors

The complex interplay between origin, epidemiologic, and socioeconomic transitions results in differences in disease risk and prevalence between and within populations. Migrant populations carry along disease characteristics, inherited from their place of origin (Bedi, Singh, Syed, Aryafar, and Arora, 2006) which affect future health risk. As migrants are exposed to new factors (including acculturative stress resulting from the feeling of isolation, discrimination, alienation and dislocation, lifestyle changes and adaptations, and access to healthcare) in their host environment, their risk of CVDs and diabetes may change over time. Current research has, however, not been able to completely unravel the effect of migration on CVDs and diabetes. This Special Issue invites papers addressing the burden and risk factors of CVDs, obesity, and diabetes among migrants globally.

- migration
- migrants
- cardiovascular disease
- diabetes
- obesity
- acculturation
- dietary changes
- non-communicable diseases

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
