Living in a Chemical World: Environmental Exposures and Health

Message from the Guest Editors

There are many benefits of incorporating chemicals into daily life products and food; however, they come with a trade-off to our health. Exposure to these chemicals, their byproducts, or their mixtures can occur throughout their “cradle to grave” life cycle, which is as follows: production, use, recycle, and disposal. This immense opportunity for chemical uptake through different routes and by all types of populations has important short- and long-term implications on human health. However, few chemicals and even fewer mixtures have been thoroughly studied in regards to their health effects. Furthermore, there are thousands of chemicals currently in use, and thousands more are constantly being added, representing an enormous challenge for research to keep up with. To promote evidence-based disease prevention, high-quality, innovative, and translational research regarding exposure to chemicals and their health effects is encouraged.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
