

Special Issue

Child-Parent Dynamics, Psychosocial Factors, and Health Outcomes

Message from the Guest Editor

We know that child–parent dynamics, such as communication, conflict, child/adolescent and/or parent mental health, and/or chronic illness in one or more family members, can significantly impact the family system, which will ultimately affect the psychosocial functioning or health outcomes of one or more family members. We are launching this special issue to address core research questions that examine child–parent dynamics, family functioning, child and/or parent mental health, and how these variables influence the health or psychosocial outcomes of one or more family members.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
