## Childhood Education and Care

### Message from the Guest Editors

The first years of a child's life encompass multiple aspects that can impact long-term psychological wellbeing for both the individual child and their familial system. The development of socioemotional and sociocognitive abilities in childhood is a critical milestone of human development. Research to date highlights that both socioemotional and sociocognitive skills start to emerge early during infancy, and it is well established that the quality of caregiving and especially the possibility to experience sensitive and positive parental behaviors, as well as efficient and sensitive educational and scholastic practices, are relevant to the development of these processes.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
