

Special Issue

Children's Care, Health, and Development

Message from the Guest Editor

Empowering young children to achieve their full developmental potential is a human right and an essential requisite to meet the sustainable development goals. In order for no child to be 'left behind', preventable child deaths must be addressed in combination with promoting healthy growth and development for all children, regardless of geography, race, religion or income level. Progress has been made to reduce mortality in children under the age of five in all regions of the world, including low-resource countries. However, many more advances are required to ensure that children thrive now and in the future. This work is urgent, achievable and cost effective. This Special Issue welcomes research pertaining to the care, health and development of children, with a particular focus on child health and well-being outcomes across a variety of domains, including education, nutrition, mental health, violence, environment, injuries, as well as communicable and noncommunicable diseases. Improvements in the survival, health and well-being of children, adolescents and their mothers are urgent, achievable and affordable.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
