

Special Issue

The Health Consequences of Chronic Energy Imbalance

Message from the Guest Editor

We are seeking papers for a Special Issue on chronic energy imbalance, related to both overweight/obesity and energy deficits such as those seen in eating disorders. Original or review articles that focus on topics such as appetite regulation, gut microbiota, musculoskeletal health, immune function, hormonal disruptions, and risk for chronic diseases are of interest. Original research articles should involve human research only and can be cross-sectional and/or intervention-based studies.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
