

Special Issue

Close Relationships and Health

Message from the Guest Editors

Relationships can be beneficial or detrimental to both our psychological and physiological health, depending on the quality and/or quantity of the relationships and the extent to which they influence health behaviors. Associations between relationships and health have been examined by advanced research methods such as prospective longitudinal designs, random controlled trials, meta-analyses, and innovative technologies such as fMRI, eye-tracking, and ecological momentary assessments. This Special Issue welcomes articles that specifically advance our understanding of the importance of social relationships, which may include, but are not limited to, those using innovative approaches, theories, or methods.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
